

BARE FIBER ADAPTER

Instrumentation &
Network Interconnects

TESTING | TROUBLESHOOTING | ACCURACY

Benefits

- Provides a fast method of temporarily connecting a fiber under test to a test instrument
- Measure the length of fiber on a spool with an OTDR without having to connectorize the fiber spool
- Measure the optical power present on a fiber without a connector
- Temporarily connect a VFL to a fiber so that the technician can inject visible light onto a fiber that does not have a connector

Applications

- Temporarily connect test instruments such as OTDR's, OPM's, and VFL's to fiber under test

Specifications:

Fiber Sizes	Up to 250 micron acrylic
Connector	SC/PC
